

K-LOVE serves my family with positive christian music with no bad language and we know that we are listening to positive music. It reaches us when we are having a bsad day or the stress of life is bearing down on us.

If k-love was replaced with a LPFM broadcaster then many people in my community would not hear the word of God proclaimed in a non threatening environment. They can listen in the homes or cars and not be overwhelmed with church etc. Then after hearing the message of k-love they can seek out a christian church home for them and thier familyies. K-LOVE reaches many people who are hopeless and have nowhere to turn and K-LOVE is able to reach out and saves those precious lives that may be lost without this positive christian radio station.

In public interest K-LOVE is reaching out to all communities they serve to share the life of Christ with those who are lost and living in a hopless world. Without K-Love many lives would not be changed and no hope found.

Please do not let this new LPFM format replace K-LOVE. God used this radio station in a mighty way and to replace it would be robbing many people of a blessing and hope that they so despartely need every day in their lives.

I want family programming available for me and my family as well as other families I know. I know if K-LOVE remains the same format and you as the FCC makes sure it stays the way it is you will receive many blessings from a good decision.

Thank You
